Job Title: Field Investigator (Innovations)

Date of Posting: August 28, 2018

Last date of Applying: September 12, 2018

Reporting to: Innovations Manager/ HTA Manger

Location: Kota & Sawai Madhopur

Organization Description:

The Wadhvani Initiative for Sustainable Healthcare (WISH) is a not-for-profit initiative of the Lords Education & Health Society (LEHS), and is working to build an equitable, innovation-led healthcare system that puts quality healthcare within easy reach of the poor. The Vision of WISH is to facilitate a demand led ecosystem for healthcare innovations, reach 10 million poor Indians, with quality healthcare services and scale up 20 high impact healthcare innovations by the year 2020.

The strategic thrust of WISH's programs is to align itself with key programmatic priorities of government and India and state governments. The three strategic intervention areas of WISH include: (i) identifying most promising innovations/social enterprises within private and public space, support them with funds and technical assistance for scale up; (ii) work closely with state government/central government to strengthen primary care using evidence based low cost healthcare delivery strategies and innovations and (iii) strengthen the healthcare ecosystem for stakeholders to connect, converge and leverage knowledge and resources creating a Knowledge Hub.

LEHS-WISH is inviting online application from professionals' expert in Field Monitoring & Coordination to join Innovations team to strengthen programs run by WISH Foundation at facility level in the field to improve primary health care. We are looking for a dynamic professional able to handle large data independently and timely providing Support to its team.

1. Work with Innovations team members in piloting healthcare innovations.
2. Work for field implementation & monitoring of all the innovations in the field.
3. Maintain inventory of all the point of care devices and machines on a monthly basis.
4. Data collection, data quality assessment, compiling and cleaning data, and reporting on a regular basis
5. Follow-up and support to front line workers.
6. Perform all the activities related to various research studies conducted by Innovations division.
7. Tackle data-related challenges assigned by Innovation manager/ HTA Manager.
8. Follow a strategy to collect data prepared by the department members.
9. Knowledge of statistical tools, algorithms, models and software (e.g. R, SAS, SPSS, etc.) is desirable.
10. Design new statistical models and data collection tools if needed.
11. Identify patterns, trends, and relationships within data.
12. Present statistical reports and data visualizations on Innovations data.

13. Provide and highlight any data limitations well in time.
14. Get the screening done for all the patients at the field.
15. Support the Field staff.
16. Work closely with key Innovations team.

Abilities/Skills:

- Fluency in spoken English and Hindi
- Good problem solving skills
- A highly self-motivated and passionate person.
- Must be a team player.
- Excellent people management skills
- Ability to work in a multi-cultural environment, and establish harmonious and effective working relationships both within and outside the organization.

Qualification and experience:

- a. B.Sc Nursing or equivalent qualification/ Graduation with experience in data analysis.
- b. Minimum of 1 year of professional experience is required.

COMPENSATION: Compensation for this position is competitive and commensurate to expertise.

LEHS|WISH is an equal opportunity employer. All candidates applying for the position should submit their resume with covering letter stating about suitability for the said position via email to career@wishfoundationindia.org

Only shortlisted candidates will be contacted. No phone calls please.
